

DANIEL JOHN BRITTO A.J

PHONE NO: 9345655206

ADDRESS: Plot no 05, Durai Nagar, Kumbakonam

E Mail ID: danielamalraj309@gmail.com

Linkedin URL: www.linkedin.com/in/daniel-john-britto-a-j-31b51a289

PROFILE

Motivated and detail-oriented **B.E-CSE**, with a strong foundation in programming, data structures and software development. Passionate about learning new technologies and applying practical knowledge to solve real-world problems. Seeking opportunities to grow in the IT industry and project-based learning.

EDUCATION

Qualifications	Institutions	Year	Score
B.E (CSE)	Madha Institute of Engineering and Technology, Chennai	2021 – 2025	76.6%
HSC	Christ The King Matriculation Higher Secondary School	2021	81%
SSLC	St.Anne's Matriculation Higher Secondary School	2019	77.4%

TECHNICAL SKILL

- ✓ **Programming Language:** Python (OOP, File Handling, Exception Handling, Data Structures), C# (Basics)
- ✓ **GUI Frameworks:** PyQt5 (basic GUI apps: Weather App, Stopwatch, Alarm Clock)
- ✓ **Frontend Technologies:** HTML, CSS, JavaScript (Basics), Angular (Basics: Components, Data Binding, Services, Routing), React (Basics: Components, Props, State)
- ✓ **Backend Frameworks:** Flask (Basics), Django (Basics), Node.js (Basics), ASP.NET (Basics)
- ✓ **Database:** MySQL, NoSQL (Basics)
- ✓ **Version Control:** Git, GitHub
- ✓ **API Testing:** Postman (GET, POST, PUT, DELETE, Authorization Bearer Token)

CERTIFICATES

- ✓ **CPPA-** Certified Python Programming Associate (Python Institute) Covered: OOP, Modules, Exception Handling, Data Structures
- ✓ **CERTIFICATE IN "C"**- Completed training in C Programming and problem solving
- ✓ **Magic connects with work program-** Connect with Work Programme
- ✓ Completed training in Communication, Adaptability, Critical Thinking, Workplace Ethics, Digital Skills, and Interview Preparation (May 2025)
- ✓ **Ethical Hacking Workshop-** KSRIET (KSR Institute for Engineering and Technology), Tiruchengode Oct 2023 Learned basics of cybersecurity and ethical hacking, Exposure to security concepts and attack prevention techniques.

TOOLS

- ✓ VS code
- ✓ Basics of POWER BI
- ✓ MY SQL WORKBENCH
- ✓ Angular Framework
- ✓ Python with Django frame work
- ✓ API Testing (Postman)

LANGUAGE

- ✓ English
- ✓ Tamil

HOBBIES

- ✓ Playing Chess
- ✓ Reading Books

PROFESSIONAL EXPERIENCE

Levantare Technology — Jan 2026 – Current

- ✓ Developed and maintained backend services using Python Flask for web applications.
- ✓ Performed API integration with frontend and third-party services, ensuring proper data flow and error handling.
- ✓ Identified and resolved UI bugs in Angular frontend, improving usability and application stability.
- ✓ Debugged issues using browser console logs and backend logging to trace errors across layers.
- ✓ Investigated and fixed production issues by analyzing network requests and API responses.
- ✓ Worked with PostgreSQL database using pgAdmin to validate data, troubleshoot issues, and support bug fixes.
- ✓ Collaborated with frontend and backend teams to resolve cross-functional defects.
- ✓ Improved application reliability by fixing bugs related to API responses, UI rendering, and database data mismatches.

Besant Technologies-Intern/Trainee (6 Months) Chennai, India | NOV 2024- APR 2025

- ✓ Completed hands on training in Python, SQL and Web Development
- ✓ Worked on mini-project like CURD apps and database integration
- ✓ Gained experience in GitHub, VS Code and MySQL Workbench
- ✓ Participated in Real-time project simulation and team coding sessions

PROJECT

Weather Forecast Application

- ✓ Developed a web application using ASP.NET and C# to display real-time weather information using the OpenWeather API.
- ✓ Implemented city-based search and date-wise weather forecast features.
- ✓ Built a responsive UI and handled API integration for dynamic data display.

Inventory Management System

- ✓ Developed and implemented using My SQL for efficient stock tracking and management
- ✓ Designed relational database schema to handle products, suppliers, order and inventory logs.
- ✓ Enabled CRUD operations and generated report to monitor inventory levels and restocking needs.

School management system:

- ✓ Designed and implemented normalized relational database schemas using MySQL
- ✓ Created tables for Students, Teachers, Classes, Subjects, Attendance, Exams, and Results
- ✓ Wrote optimized SQL queries, joins, triggers, and stored procedures for data processing

Phishing Detection website:

- ✓ Implemented a phishing detection system using the XGBoost algorithm, achieving [your accuracy] % accuracy on benchmark phishing datasets.
- ✓ Engineered features from URL structure, domain registration, and webpage content to improve model performance.
- ✓ Deployed the trained model using Flask/Streamlit for real-time phishing URL classification and user alerts.

Decentralized e-voting system using Blockchain technology with face recognition:

- ✓ Developed a decentralized e-voting system using Ethereum blockchain and smart contracts to ensure secure, transparent, and tamper-proof elections.
- ✓ Integrated face recognition (Python, OpenCV) for biometric voter authentication, enhancing system integrity and preventing voter fraud.
- ✓ Used Web3.js and IPFS for blockchain interaction and decentralized storage, with a user-friendly React frontend and role-based access control.

TODO App (Python with Django Framework)

- ✓ Developed a full-stack To-Do web application using Python, Django, HTML, CSS, and Bootstrap.
- ✓ Implemented CRUD functionality (Create, Read, Update, Delete) for managing daily tasks.
- ✓ Designed Django models, views, forms, and templates to handle user input and task management.

Employee Management System (Python with oops)

- ✓ Developed a console-based Employee Management System using Object-Oriented Programming (OOP) principles in Python.
- ✓ Implemented core OOP concepts such as classes, objects, inheritance, encapsulation, and polymorphism to manage employee data efficiently.
- ✓ Built features to add, update, delete, search, and display employee records.

Task Priority Manager (Python with Data structure)

- ✓ Developed a Task Priority Manager application in Python using core data structures such as lists, dictionaries, heaps (priority queues) for efficient task handling.
- ✓ Implemented functionality to add, update, delete, and view tasks with assigned priority levels (High, Medium, Low).
- ✓ Used a priority queue / heap to automatically organize tasks based on urgency and importance.
- ✓ Designed algorithms to sort tasks, manage deadlines, and retrieve high-priority tasks in constant or logarithmic time.
